

BNA 2026

Chanel's Atelier

Brief Study Guide

Chanel's Atelier

Greetings Traveler!

Welcome to the realm of fashion and graphic design, a trial serving creatives and fostering artistry. Here we create, mould and design a plethora of stunning ateliers that stretch the fabric of reality and cross into the digital realm. Let your creativity reign and remember to embody your inner Anna Wintour as you travel through this world of brilliance and innovation.

Fashion is one of the most dignified forms of self-expression, perfectly embodying the personal style and aura of its wearer in the form of colors, shapes, patterns and more. Its prowess is not to be underestimated; fashion communicates powerful messages simply through visuals, texture and movement. This aspect of design is mirrored by the cyber-graphics of the digital world, providing a creative outlet for artists without the hassle . of stitching, fitting and printing.

With meta fashion on the rise, our delegates will be tasked with entering this new world to challenge their creative borders, encouraging them to hone their skills in fashion and design. For this trial, delegates will need to create a **fashion line**—via digital design and graphics—embodying the essence of BNA through the incorporation of quintessential design elements and themes (a comprehensive list of such elements will be provided).

With a design software as their weapon of choice, delegates must enter the battlefield with a show topping line with full discretion of exploring different styles, palettes and articles of clothing (hats, gloves, scarves etc.) However, it must be ensured that every marvellous article is followed by a comprehensive description on how it reflects BNA and all that it stands for. The number of items in the line will be specified before the commencement of the trial.

Wield your sword of mastery and delve into this realm of creativity. Will you rise to the occasion? Or will you join the fallen angel? Only one way to find out.

Perks

The winning delegation will acquire a revelation which is sure to give them the upper hand in the **mandatory tribulation BSX**, gaining access to 3 updates in the tribulation prior to their public announcement. Here's the catch: the delegation will be required to pick one out of the 3 days on which they'd like the update—which will be provided a maximum of 30 minutes before its official release. Time is of the essence! Use it wisely
